

PLANTER- #1827- #1851- #2020PT- #2034PT

Quality Western Red Cedar with Handcrafted Construction

Assembly Instructions: All holes are pre-drilled and screws are included. Check all packing material carefully before discarding as shortages of parts may occur from parts left in packaging. Read instructions carefully before beginning to assemble your PLANTER.

Tools Required for Assembly: #2 Phillips screwdriver or an electric screwdriver with a #2 Phillips head bit

PARTS LIST:

2 Long Panels with Legs (Front & Back) 8- 3” Screws for each Box assembly
2 Short Panels (Sides)
1x 4 Slats: 4 for 2020PT ; 8 for 2034 ;
6 for 1827 ; 12 for 1851

ASSEMBLY:

NOTE: This assembly is best executed with two people.

STEP 1: Place the 4 Panels upside down on a flat surface in order to form a box
(See Figure 1 or 2)

STEP 2: Screw the 4 Panels together with the 8- 3” screws using the pre-drilled holes

Note: The 2 Short Side panels go to the **INSIDE** of the Long Panels

Note: **ALL** panels are marked with “**BOTTOM**” which will face **INSIDE**

STEP 3: Turn the Planter over so the legs are on the ground

STEP 4: Insert the 1x 4 slats in the bottom of the planter spacing the slats evenly.

Note: Western Red Cedar contains natural preservatives, so it resists rot, and weathers well. These qualities make cedar ideal for outdoor use. A quality sealer or stain on all areas will delay the graying of the wood and give additional protection. Cedar will weather to a silvery gray if left in its natural state. We would recommend a location for your garden planter that will receive full sun light. Ordinary soil is too heavy for container gardening and we would recommend a light pre-mixed soil.
