

LARGE WOOD BOX- #2035

Quality Western Red Cedar with Handcrafted Construction

Assembly Instructions: All holes are pre-drilled and screws are included. Check all packing material carefully before discarding as shortages of parts may occur from parts left in packaging. Read instructions carefully before beginning to assemble your LARGE WOOD BOX.

Tools Required for Assembly: #2 Phillips screwdriver or an electric screwdriver with a #2 Phillips head bit

PARTS LIST:

1 Cedar Lid	8- 3” Screws for Box
2 Long Panels (Front & Back)	8- 1” Screws for Hinges and Chain
2 Short Panels (Sides)	
1 Plywood Base w/ Weep Holes	

ASSEMBLY:

NOTE: This assembly is best executed with two people.

STEP 1: Place the 4 panels upside down on a flat surface in order to form a box
(See illustration)

STEP 2: Screw the 4 Panels together with the 8-3” screws using the pre-drilled holes
Note: The 2 Short Side panels go to the **INSIDE** of the Long Panels.
Note: ALL panels are marked with “**BOTTOM**” which will face **INSIDE**

STEP 3: Turn the Bench over so the legs are on the ground

STEP 4: Insert the Plywood Base in the Bottom of the box

STEP 5: Cedar Lid Assembly: Locate the back of the box by locating the pre-marked holes for the hinges. Lay the Cedar Lid on **TOP** of the box with the hinges on the **OUTSIDE** of the box. Line up the hinge holes with the pre-marked holes and secure the hinges to the box with the 1” screws.

STEP 6: Move the bench near a wall so that you may rest the cedar lid against a wall.
Secure the chain to the **INSIDE** of the short side panel with the 1” screws.

Note: Western Red Cedar contains natural preservatives, so it resists rot, and weathers well. These qualities make cedar ideal for outdoor use. A quality sealer or stain on all areas will delay the graying of the wood and give additional protection. Cedar will weather to a silvery gray if left in its natural state. We would recommend a location for your garden planter that will receive full sun light. Ordinary soil is too heavy for container gardening and we would recommend a light pre-mixed soil.
